

The Leading Network for Innovation at Independent Schools

OESIS Tutoring & Course Exchange.

Some of our member schools are [announcing](#) no returns this year to campus and extending remote learning for the next three months: the CA governor yesterday [stated](#) a similar expectation for all CA public schools.

In anticipation of the resulting student needs now through the summer (we previously broadcast in [recent correspondence](#)), we have been readying the [OESIS Tutoring & Course Exchange](#), for all independent schools, parents and teachers. The difficult adjustment to remote learning mid-year will leave, we suspect, major gaps in the content and sequence over the next few months. Serving your students not only in the short-term, but also in the medium-term through the summer now has to be [an equal priority](#). The school year will effectively end **when** we are all caught up.

OESIS_{TCX} provides three solutions:

Online Independent School Tutors. Schools and parents are likely to recognize that now through the summer, their kids will need further scaffolding to get back on track. OESIS_{TCX} already has [20+ core subjects](#) covered with multiple tutors at different rates, after having reached out to just our OESIS Leaders in our faculty network: we are accepting only teachers with independent school backgrounds at this time, but believe the demand is significant nationally through August. If you are a teacher, please fill out the [Teacher Interest Form](#) or forward it. Students can register their interests too using this [Student Interest Form](#), which is also on the website.

Summer Innovative Elective Pathways. With travel likely compromised into the summer, more limited in-residence and pre-collegiate options available, and with teacher summer job opportunities limited, we are looking to offer summer student-driven online pathways to keep students engaged: schools can provide these under their school brand on the exchange or encourage their teacher to offer these during their summer time off under the OESIS Network brand. These will include a student portfolio and they will be assessed according to cross-curricular competencies. You will see [a list of innovative electives](#) that schools are already preparing to offer. We are setting these up over the next 3 months: providing the LMS hosting, an e-portfolio and design advice. If you are a teacher or school with interest, please fill out the [Teacher or School Interest Form](#). Students can also [pre-](#)

[register their interest](#) with enrollment beginning early May for mid-June starts.

Summer Core Credit Classes. If you are a school planning opportunities for your students to either retake a class they were unable to complete or take an accelerated credit option, we are focusing on 15+ core online summer classes, [mostly in Math, Languages and Pre-AP levels](#), that are usually in demand in this category. We have a number of schools in our network now planning to offer these classes to their students with enrollment open to others in the network: [School Core Summer Class Interest Form](#). We will help with teacher training, and platform or content development from your current content, if necessary. Enrollment will begin in a month and students can [pre-register their interest](#) for us to match them for mid-June starts.

Blessings, Good Health & Perspective.

Sanje Ratnavale

President.
